Professional Summary

Experienced UX/UI Designer with 5+ years in digital product design, enterprise platforms, and telecommunications projects. Skilled in Figma, Jira, Adobe Creative Suite, and Agile collaboration, with a proven track record of designing intuitive, scalable, and user-focused interfaces. Adept at working closely with developers, business analysts, and stakeholders to deliver impactful design solutions in regulated and complex industries. Committed to creating accessible, responsive, and human-centered digital experiences that align with both user needs and business objectives.

Experience

UX Designer

SELISE Bhutan, Tech Park, Thimphu, Bhutan

March 2023 – July 2025

- Designed enterprise-level platforms for telecommunications products, focusing on scalability and usability.
- Produced wireframes, prototypes, and UI components in Figma, ensuring consistency with design systems.
- Collaborated with cross-functional Agile teams (developers, BAs, product owners) to deliver sprint-based outcomes.
- Advocated for user-first design practices, applying usability testing and iterative improvements.
- Enhanced responsiveness and accessibility across platforms, boosting customer engagement and satisfaction.
- Maintained and scaled digital design systems and guidelines.

- Designed social media posts, banners, flyers, and digital greetings to maintain brand presence.

ICT & Digital Design Officer

Heavenly Bhutan, Thimphu, Bhutan

December 2021 – February 2023

- Managed and maintained the entire company ICT infrastructure, including office network systems, local servers, and secure connectivity.
- Assisted in graphic design, including social media posts, posters, flyers, greetings, and website updates, integrating creative solutions with ICT systems.
- Installed, configured, and maintained computers, routers, printers, scanners, and CCTV networks.
- Handled software installations, Windows setup, and user access management for smooth daily operations.
- Supported company websites and internal systems, ensuring uptime and resolving technical issues.
- Conducted hardware diagnostics and repairs, replacing faulty components as needed.
- Collaborated with external vendors for hardware procurement, upgrades, and network expansion projects.
- Provided technical support to staff across departments, ensuring minimal downtime.
- Assisted in graphic design and website updates, integrating ICT and creative solutions.
- Provided technical support across departments, minimizing downtime and optimizing workflow.
- Managed social media content scheduling and design to strengthen brand presence.

Web Designer (Freelance)

Toronto Cannabis Expo, Toronto, Canada

February 2021 – November 2021

- Designed and developed the official WordPress website, ensuring a fully responsive and visually engaging event platform.

- Managed end-to-end website setup including domain configuration, hosting management, DNS setup, and performance optimisation.
- Built custom WordPress themes and components using PHP, HTML, CSS, and JavaScript to meet unique event requirements.
- Integrated plugins for ticketing, registration, analytics, and SEO performance.
- Conducted A/B testing and user feedback sessions to refine usability and boost audience engagement.
- Maintained site security, updates, backups, and uptime monitoring throughout the event cycle.

Web Designer (Freelance)

The Park Dale Hall, Toronto, Canada

May 2020 – January 2021

- Designed and developed the organisation's WordPress website, improving overall accessibility and user navigation.
- Managed domain registration, hosting environments, cPanel configuration, and server-side optimisation.
- Created custom WordPress templates and front-end components using PHP, HTML, CSS, and JavaScript.
- Implemented booking forms, event listings, and automated email notifications to enhance usability.
- Conducted performance audits, mobile responsiveness testing, and SEO enhancements.
- Ensured security hardening, regular updates, and backup management for long-term reliability.

Network Support Engineer

TashiCell InfoComm Pvt. Ltd, Thimphu, Bhutan

November 2019 – April 2020

- Provided technical support for enterprise-level network infrastructure, ensuring stable and secure connectivity for internal teams and customers.

- Installed, configured, and maintained KVM servers, including hardware setup, virtualization environments, and system monitoring.
- Managed internal internet extensions, LAN/WAN connectivity, and routing configurations for smooth daily operations.
- Diagnosed and resolved customer internet issues, including fibre, wireless, and router-related problems.
- Assisted with server upgrades, system backups, and network performance optimisation.
- Collaborated with product and engineering teams to improve internal tools and contributed to UI enhancements for network management systems.
- Documented troubleshooting procedures and supported team workflows to reduce downtime and improve service delivery.
